

## **Exhibit 21 (2) Drugmakers to avoid safety shortcuts?**

"Just received (September 9, 2020 -after the writing of this communication and in particular this "Exhibit" 21" – the following headline from "[Bloomberg](#)" a very respectable and authentic source: **"Drugmakers Pledge to Avoid Safety Shortcuts on Covid Vaccine"**.

"...In an unusual public letter, the companies agreed to submit the vaccines for clearance only when they're shown to be safe and effective in large clinical studies..."

In principle Mr. Trudeau I am sure that most Canadians will agree with this action by the named corporations but I have to question **the sincerity** of one of the named vaccine supply parties named in this publication: **NOVAVAX**- as discussed above.

Its integrity (court actions) and its self-evaluation discussed and demonstrated in the filing with the US "**Securities and Exchange Commission**" should leave no doubt about its risky acceptance as a supplier of vaccines for Canadians.

(Please refer to "Exhibit 21" for more information about NOVAVAX)
